Gladiolus

The only gladiolus which we had grown previous to 1922 consisted of about fifteen varieties such as America, Panama, Peace, Halley, Prince of Wales, etc. In that year we purchased a number of new varieties from A. E. Kunderd, and the beautiful blooms from that stock aroused an interest in the gladiolus which has endured to the present.

In the spring of each succeeding year, after a study of all available price lists, such varieties as could be afforded were purchased. These multiplied so rapidly from bulblets that we were forced to dispose of a portion of the increase.

Our planting soon comprised several hundred varieties and assumed the nature of a gladiolus museum. We realized that many of the varieties we were growing did not repay us in pleasure for the work expended in their growing. We decided to eliminate such varieties and found that many high priced novelties, several purchased at ten dollars per bulblet, fell in the undesirable class.

A great many thousand bulbs of these varieties were burned without recovering one cent of the initial investment. Of approximately one thousand varieties that we have tested we retained less than two hundred in our last year's planting.

We offer only the best varieties and supply a quality of stock equal to the best obtainable anywhere. Our experience has taught us that there are a large number of growers whose opinion and integrity deserve respect. We have found many less careful and have received bulbs with certificates of inspection that were very badly diseased and untrue to name. In comparing prices do not expect us to meet the prices of unscrupulous growers who ship inferior stock. We will meet the price of any grower offering a quality of stock equal to our own if we have sufficient stock.

Our large winnings at the Michigan State Gladiolus Show at Kalamazoo again demonstrated that in our elimination of varieties we have succeeded in selecting those for propagation which are the equal of any in commerce.

We do not have room to print the many letters we have received commending us on the high quality of our bulbs. Several of these are from persons known to gladiolus growers throughout the world. We have had but four complaints in the eight years we have been shipping bulbs. In each case we made replacement, and two of these parties subsequently remitted, stating they were in error in assuming that the first shipment was not true to name.

Growing the gladiolus has been a hobby with us and we wish to keep it so. Several years ago we began growing seedlings from hand-pollinated seed. We wish to limit our future plantings to our seedlings and such varieties as are needed to improve them.

We are therefore offering our entire stock of the finest varieties in extra quality bulbs at prices which do not repay us for their production. From these prices it is not to be construed that we have any large quantity of a variety to offer, and our quotations should have no bearing on the prices of the trade. These are selling-out prices on a stock of little more than 500,000 bulbs. We intend to retain only our seedlings and the rarer varieties. If we do not succeed in disposing of our stock by April 1 we will issue a list of lot prices on total quantity of each variety still unsold. If interested in this list reserve your copy now.

The bulbs which we offer are of our own growing and it is not our intention to purchase for resale. All stock is offered subject to prior sale. We do not substitute if sold out of a variety.

NOTE. If you are interested in thousand lots of No. 6 bulbs of the following varieties we will be glad to give you a special low quotation: Gold Eagle, Golden Dream, Purest of All, A. E. Kunderd, Osalin, and Gloriana.

SIZE OF BULBS. The standard sizes are employed in grading these bulbs according to diameter. No. 1 bulbs are $1\frac{1}{2}$ inches or more; No. 2 bulbs, $1\frac{1}{4}$ to $1\frac{1}{2}$ inches; No. 3, 1 to $1\frac{1}{4}$ inches; No. 4, $\frac{3}{4}$ to 1 inch; No. 5, $\frac{1}{2}$ to $\frac{3}{4}$ inch; No. 6, $\frac{1}{2}$ inch or less. Nos. 1 and 2 produce the largest bloom; Nos. 3, 4 and 5 bulbs produce smaller blooms but usually give more bulblet increase and grow into large bulbs before harvest time. No. 6 bulbs of many varieties will frequently bloom if planted early and given special care. The same is true of bulblets.

If bulb order amounts to \$10.00 deduct 10% on items not ordered at 1000 rate, except no discount on varieties priced at \$1.00 or more for No. 1 bulb. 20% discount on similar items for \$20.00 order.

PRICE OF BULBS. To find the price of a single bulb, divide the price of ten bulbs by eight. No single item less than ten cents. 25 bulbs at the 100 rate; 250 bulbs at the 1000 rate. If your order is made up of single bulbs or lots of ten in different varieties as listed in first line quoted and amounts to \$10 send your list for special quotation.

BULBLETS. Where price warrants, bulblets will be furnished in package lots at 25c per package. The number of bulblets furnished will be based on scarcity of variety. We will treat you liberally.

TERMS. No order accepted for less than \$1 except locally. Prices include delivery if order amounts to \$2. Cash with order up to \$5. A 25% deposit will hold larger orders until March 15th; balance before shipping or bulbs will be forwarded by express collect.

PRIZES. Winners of prizes donated to shows shall make their own selection of varieties but they must be in No. 1 or No. 2 size bulbs.

Gladiolus in Mixture

Many people wish to have a collection of the best gladiolus, but they are not interested in keeping each variety separately labelled. In order to supply the finest mixture we will make up collections from separately grown varieties upon receipt of order at prices listed below. These collections will include all colors, and the proportion of colors can be varied to comply with your wishes.

BULBS PRICED PER 100; 25 AT THE 100 RATE

	No.1	No.2	No.3	No.4	No.5	No.6
Extra Selected Mixture	\$2.00	\$1.80	\$1.60	\$1.20	\$0.90	\$0.60

Rock Garden Plants

We are fortunate in having in Midland two expert growers of Rock Garden Plants in the person of Dr. Grether and his son. Dr. Grether is an expert botanist, and his son received his horticultural education and practical experience in Switzerland, the native home of so many plants suitable for the rock garden. If you are interested in receiving a price list of the better varieties and novelties write to: Ernest Grether and Son, W. Park Drive, Midland, Michigan.

Iris

We grow about 175 varieties of Iris which we have purchased from France, England, and America. We offer these for sale during the months of July, August, and September. For Spring planting we supply only the following:

12 rhizomes in at least 6 named varieties - - - - - \$1.00

Exhibition Dahlias

We have grown the large type of Dahlias for 10 years, and from our extensive tests are offering varieties which grow well in our climate. Many can be grown to a very large size, often exceeding 10 inches in diamter. They all possess long stems for cutting.

Prices are for single tubers delivered in good growing condition. If unsatisfactory, return at once and stock will be replaced or money refunded.
